
The course takes an interdisciplinary approach to energy developments and addresses multiple aspects of sustainable energy transitions, including social, technical, economic, geographical, and other aspects. The summer school will be held at the Aalborg University Esbjerg Campus, between the 22nd-24th of May 2013. More information on the programme and registration details can be found at http://www.iss.uio.no/transformation.

The Energy Summer School 2013
The Energy Summer School 2013 will take place in Grønning (the Netherlands) from 17th to 20th June 2013.

The key topic of this summer school is sustainable energy transition. Inspired by PhD students from different disciplines who work in the field of energy, the summer school seeks to mediate policy approaches to energy, developments and disciplines multiple aspects of sustainable energy transitions, including social, technical, economic, geographical, and other aspects. During the summer school the PhD students will attend lectures by experts in the field, present their own work, and participate in workshops and discuss how information can be found and communicated.

Theories of Sustainable Transitions' PhD Course
The Energy Summer School 2013 is a joint effort of the European Research funders' network 'JPI CLIMATE' for submissions to the Future Research Leaders Forum on 'Societal Transformation in the face of Climate Change: Promising Research Directions'. Further information can be found in the encyclopedia called document as well as on the following website: http://wwwTRANSFORMATION.
